Manish Kumar

FRONTEND DEVELOPER

Bihar,india | 8210328929 | manishraz800@gmail.com

Professional Summary
Portfolio [Manish Kumar](#)

A motivated and detail-oriented Frontend Developer, eager to apply knowledge of HTML, CSS, JavaScript, and React to build responsive and interactive web applications. Strong foundation in frontend technologies and eager to learn and grow in the field of web development.

Project

- **AI Chatbot Platform – GPT-style Conversational AI (Personal Project)**
  - Designed and developed a custom GPT-style conversational AI clone from scratch with short-term and long-term memory capabilities, enabling context retention over sessions.

- Implemented real-time bi-directional communication using Socket.IO, supporting scalable, live chat interactions.

- Engineered memory architecture to distinguish between ephemeral (short-term) and persistent (long-term) user context

  Moddy-Player
  - Designed and implemented a smart music player that uses facial emotion detection to auto recommend and play music.
  - Emphasized performance optimization and user interaction in a live system

---
